

Gander Oceanic Core Privacy Policy

Version	1.2
Effective:	9 January 2020
Next Review:	N/A
Authority:	Webmaster

Table of Revisions

Version	Effective Date	Changes
1.0 (Initial)	9 December 2018	--
1.1	15 July 2019	Added information on CoC A4
1.2	9 January 2020	Added Discord OAuth data collection, refreshed some sections, reformatted

1 Purposes of this document

To provide services for users of the Gander Oceanic Core web system, we collect data via the VATSIM Single Sign On (SSO) service. This policy outlines the data collected, how this data is used, and how a user can manage the data used. This policy also applies to other services provided by the FIR outside of the Core system. This policy sits alongside VATCAN and VATSIM policies.

This policy aims to comply with European Union General Data Protection Regulations, and applies to all users of Gander Oceanic Core and other services regardless if they reside in the European Union or not.

2 How to contact us

To contact Gander Oceanic you can do the following:

- submit a support ticket at <https://czgo.vatcan.ca/dashboard/tickets> (account required); or
- email the relevant staff member using emails provided at <https://czgo.vatcan.ca/staff>.

For privacy related matters, contact the Webmaster with the subject “ATTN: Personal Data Request” using the email associated with your VATSIM.net account.

3 Data we collect

Gander Oceanic Core collects the following data from your VATSIM.net account or Discord account:

- VATSIM Certificate Number (CID)
- Full name as shown on your VATSIM CERT record
- Email address as shown on your VATSIM CERT record
- VATSIM subdivision, division, and region
- VATSIM controller rating
- Your Discord User ID, used to access your profile information.

No private data relating to authentication (other than email address) is read or retained by us. This includes passwords, private keys, etc.

4 Why we collect data

The Core system collects the aforementioned data in order to provide effective services within the Core system. Your data is used to populate your profile in our database. Your data is used to allow staff members to customize your experience as required. Your data is used to process requests for oceanic training. Your data is used to send communications via email or via the support ticket system.

5 How we get your permission to use your data

By logging into the website using the VATSIM SSO, you automatically agree to the terms of this privacy policy, and consent to the use of your data in the ways described in this document. If at any time you no longer consent to the use of your data in any of the ways described in this document, then you may request to have your account and all associated data removed from our servers.

By linking your Discord account through Discord OAuth, you automatically consent to the use of your Discord data in the ways described in this document. If at any time you no longer consent to the use of your Discord data in any of the ways described in this document, then you have the ability through your dashboard to unlink your Discord account. This action will automatically remove the Discord data associated with your account from our servers.

6 Who access to data and who is data shared with

Gander Oceanic does not share or provide access to your data to members outside of our staff team. Our staff team includes our Instructor team, Executive team members, and senior VATCAN staff members.

Publically available data, such as your Gander Oceanic roster status is available to be viewed by the general public (ie. people without an account). This is required for a member to stay on our roster.

7 How we manage your data

All data is securely stored on the Gander Oceanic server, which is accessible by the Webmaster and the FIR Chief.

7.1 Requesting a removal of personal data

You have the right to request that we remove all or certain bits of data from our service. To request this, either go to the “My Data” section of the Gander Oceanic Core website, or email the Webmaster/FIR Chief with the subject line “ATTN: Data Removal Request” with the email associated with your VATSIM.net account. Under GDPR, we have up to 30 days to comply. We will email you with a confirmation when this is completed.

Removal of your data does not prevent you from providing us permission to use your data again in the future.

7.2 Requesting an export of personal data

You have the right to request an export of all or certain bits of data from our service. To request this, either go to the “My Data” section of the Gander Oceanic Core website, or email the Webmaster/FIR Chief with the subject line “ATTN: Data Export Request” with the email associated with your VATSIM.net account. Under GDPR, we have up to 30 days to comply. We will email you with a confirmation when this is completed.

8 Email communications

Email marketing communication from the FIR is an opt-in process. We use marketing emails to promote events, send news about non-critical events, and for other related reasons. To opt-in to marketing emails, follow the procedure in the Core dashboard. All other important emails cannot be opted out of. These include critical news events, roster checks, and other communications at the discretion of the FIR staff.

9 VATSIM Code of Conduct section A4(b)

Gander Oceanic FIR allows you to change your display name on the service. This display name will change how your name is presented to all users on the website and Discord server. It is highly recommended to keep your display name on the Gander Oceanic service in line with the display name you use on the network itself.

Gander Oceanic FIR stores your CERT full name as per VATSIM CERT's record of you in the database. This is only visible to the Webmaster, FIR Chief, and VATCAN Staff. We will never distribute this name outside of this group.

10 Changes to this policy

Changes to this Privacy Policy will be communicated via the news section of the website.
